

The screenshot displays a complex dashboard titled "Platform / Cockpit". At the top, a navigation bar includes a search function, a "New Alert" button, and a user profile icon. Below this, a red banner indicates "Attention: 2 agents currently in error state." with a "View Issues" link.

The main section is titled "SYSTEM STATUS" with a "LIVE" indicator. It shows the system is "Fully Operational" and provides summary statistics: "Last sync: 2s ago", "52 agents", "12 open positions", and "\$4.8M deployed". An "Export" button and an "EMERGENCY 12 Open Positions" alert are also present.

A row of market data includes: SPY 518.23 (+8.42%), QQQ 439.16 (+1.84%), IWM 286.16 (+8.21%), BTC 67,752.89 (+3.68%), ETH 3,856.5 (+3.38%), VIX 16.6 (+15.26%), and GLD 195.4.

A status bar at the bottom of this section shows: "API STATUS: Connected", "LAST TRADE: NVDA +508 @ \$898.25 (2m ago)", "PENDING: 3 Signals", "OVERRIDES: 0", and "RISK STATUS: Normal".

The dashboard is divided into two main columns. The left column features a "PERFORMANCE" chart showing NAV over 30 days, with tabs for 1D, 1W, 1M, 3M, and YTD. The right column displays "AGENT FLEET STATUS" for 52 units, showing 38 active, 8 paused, 4 training, and 2 errors, with a "View All Agents" link.

A large, semi-transparent watermark "https://getfireshot.com" is overlaid across the center of the image.

Below the main dashboard, there is a "LIVE DATA" section with tabs for "System Activity", "Positions", and "Allocation". The "System Activity" tab is active, showing a "RECENT ACTIVITY" list with entries like "Volatility Warning", "Agent Signal", "Curator Decision", "Risk Alert", and "Trade Executed".

To the right of the activity list is a "WATCHLIST" table:
